HIS RIDICULOUS CLAIMS PUNCTURED BY HOLMAN AND SAYERS.

Hard, Cold Facts Showing That Read's Congress Compelled Appropriations by the Present One-Public Debt Reduction by Cleveland and Harrison

first congress ended The World predicted a deficiency in the treasury. The secretaries of the treasury under the pres ent administration have concealed the deficiency by counting among their available assets uncurrent funds, the bank note redemption fund and the gold reserve and by helding up appropria-Mons. This fact and its true meaning have been exposed and explained by The World from time to time, and now Representatives Sayers, Dockery and Holman, after an examination of the government's accounts for the past two years, verify The World's predictions by showing that there is a real deficiency of more than \$100,000,000.

Last year, because of the extravagance of the billion dollar congress, the secretary was unable to meet the requirements of the sinking fund, and this year he will fail again to pay the amount required by law to be set aside toward the satisfaction of the public

estimate that the deficiency will be \$50,000,000 besides the sinking fund. If | He was graduated from the Georgetown to this sum there be added the amount (D. lack of present funds compelled the administration to extend \$35,364,500 of the 435 per cent. bonds, so that more than \$99,000,000 must be added to the deficiency, together with \$84,000,000 representing the surplus in the treasury at the end of Cieveland's term, in order to tive cost of Mr. Harrison's and Mr. Cleveland's administrations. In fact, the appropriations for the four

years of Mr. Harrison's administration have exceeded those for the four years of the Cleveland's term by \$441,944,304. Ex-Speaker Reed excuses this profiigacy by asserting that the Democrats are as much responsible as the Republicans. Mr. Sayers and Judge Holman puncture this claim. The apparent ex-

cess of appropriations for the first session of the Fifty-second congress over those for the first session of the Fiftyfirst is \$13,245,181.93. But of the sums appropriated by this congress there was made absolutely necessary by the legislation of the Fifty-first congress the enormous amount of \$79,527,602, and of these \$60,052,843 may be charged prop erly to Republican legislation. Among them are the ocean subsidy

bounty, amounting to \$390,290; cost of collecting sugar bounty, \$230,890; the sugar bounty itself, \$19,000,000, and pension increase, \$48,000,000. The Republican party cannot escape responsibility for either the extravaextravagance which it entailed upon

legislation, or for the deficiency which

it has created .- New York World. An Auspicious Outlook,

The outlook for the triumph of the Democratic candidates and Democratic principles is indeed auspicious. Is all sections of the country nothing but good reports are heard, and in all sections Democrats are confident that Cleveland will be the next president. The independent vote of the country is rallying around our standard bearer to a greater extent even than was anticipated. Importance of Achieving Victory. The importance of achieving victory is so orgent and the disastrous consequences of defeat are so manifest that no chances which may aid in winning the battle must be neglected. The depressing effect upon the country and the party which would inevitably follow a Democratic repulse in November was truthfully portrayed by Mr. Cleveland in his speech, and he emphasized the necessity for "systematic and intelligent effort on the part of all who are enlisted in our cause," Vigorous fighting and brilliant campaigning alone will not win the election. That army fights most successfully whose forces are most compactly organized and whose movements are directed by an intrepid, skillful and confident commander. The valiant soldiers of Democracy can safely trust the wisdom and the courage of their leader in this campaign.—Chicago Herald.

The Worsout Free Trade Howl. The Republican tendency in tariff leg-islation has unmistakably been toward excessive protection. It is a tendency that the Democracy desires to check, It will be checked without pro -ling toward the opposite extreme. The issue is moderation against excess. The Republican platform is embodied in the McKinley bill. Our opponents must successfully defend that measure or be beaten. The false and outworn free trade how has nothing to do with the case. An Astounding List.

It takes ten columns of space in the New York World to recapitulate all the strikes which have occurred in protected industries in this country since the Mc Kinley law went into effect. The man reach a conclusion indicative of the rela- nitude of the list is astounding, even to those who have long been convinced that "protection" protects capital in its city of New York capable of so honoring aggressions on labor. Sixteen days after the act went into effect 1,200 iron miners at Dayton, Tenn., struck against a re duction of wages. That was the first, and it has been followed by no fewer For all favors bestowed upon me I am than 473 strikes against reduction of wages under the operation of the Mc-Kinley tariff iniquity. As The World expresses it, there "has been no instant of time since the McKinley tariff act | ed in the past have been adopted solely went into effect that there has not been in progress somewhere within the United States a strike against a proposed reduction of wages in some pro-tected industry."—St. Paul Globe,

A Constantly Narrowing Margin. The impressiveness of Grover Cleve and's speech was principally in the fact I have actively participated in politics that he spoke truths that all have experioaced, when he said that the people are "burdened as consumers by a tariff system that relentlessly and unjustly demands from them in the purchase of the necessaries and comforts of life an amount scarcely met by wages of hard gance of the billion dollar congress, the and daily toil." From every city and protective system as applied to manuhamlet in the land the facts prove this facturers and laborers gives the former truth, and no sweeping general state all advantages through the increased ment can convince the consumers of the prices they are able to charge for arsucceeding congresses by its permanent country, who see the margin between wages and cost of living grow thinner and thinner, that they are being benefited by Republican protection.-Utica (N.

An Edifying Object Lesson. In the proof of the enormous profit nade by the Carnegie company in the roduction of steel ingots under the Mc-Kinley tariff may be seen the ground on which Mr. Swank congratulated the members of the Iron and Steel association on the passage of "the most protec tive of all the tariff schedules." too, will be seen the basis of Mr. Carnegie's ability to exemplify the great American system of protection by purchasing castles in Scotland, England and other countries, whose citizens he desires to cheer with a sight of a triumphant Democrat. Will Republican organs continue to defend the iron and steel schedule?-Chicago Times.

"They Know Their Enemy." It is all very well to shout that the force bill is dead. It is all very well to cry aloud that the Republican party is now a party of love, having forgotten its old hatreds and wiped off the pages of its history the many former attempts to make the federal bayonet control the southern ballot. Southern white men are not to be deceived, however. They know their enemy, whether behind a domino or in the broad glare of electricity.-Nashville American.

The Silent Vote for Cleveland. The quiet satisfaction with the course of events is visible everywhere. Men are not saying much. But wherever a Cleveland and Stevenson club is formed the membership is apt to be heavy. Stultifying Themselves.

To a great extent the reciprocity project was a humbug. It was intended as a sugar coating for the bitter pill of the McKinley tariff. "What do we care for abroad?" said Major McKinley. "Lee us cultivate and develop the home market and leave foreign trade to take care of itself," said other leading lights of Republicism. Yet in spite of these declarations of antagonism to foreign equity.
